

Load data

```
[data, label] = xlsread('Health index1.csv');  
data = data(:, 1:15);
```

Default normalise

```
% 1 - Normalised along columns  
X = normalize(data,1);  
[coeff, score, latent, ~, explained] = pca(X); % X is your 470x15 data  
cumulative_variance = cumsum(explained);  
  
% Plot  
figure;  
subplot(1,2,1);  
bar(explained);  
xlabel('Principal Component');  
ylabel('Variance Explained (%)');  
title('Individual Explained Variance');  
  
subplot(1,2,2);  
plot(cumulative_variance, 'o-');  
xlabel('Principal Component');  
ylabel('Cumulative Variance Explained (%)');  
title('Cumulative Explained Variance');  
grid on;
```

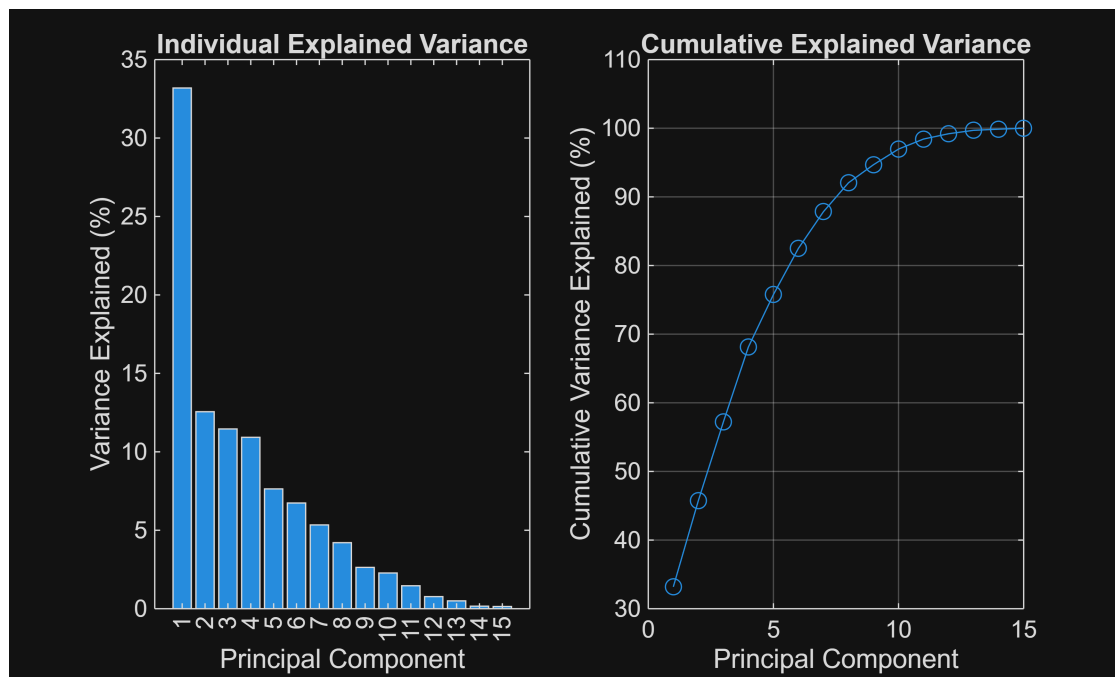

Normalised by 'norm'

```
X = normalize(data,1,'norm');
```

```
[coeff, score, latent, ~, explained] = pca(X); % X is your 470x15 data
cumulative_variance = cumsum(explained);

% Plot
figure;
subplot(1,2,1);
bar(explained);
xlabel('Principal Component');
ylabel('Variance Explained (%)');
title('Individual Explained Variance');

subplot(1,2,2);
plot(cumulative_variance, 'o-');
xlabel('Principal Component');
ylabel('Cumulative Variance Explained (%)');
title('Cumulative Explained Variance');
grid on;
```

Normalised by 'scale' - Normalised by standard deviation by 1

```
X = normalize(data,1,'scale');
[coeff, score, latent, ~, explained] = pca(X); % X is your 470x15 data
cumulative_variance = cumsum(explained);

% Plot
figure;
subplot(1,2,1);
bar(explained);
xlabel('Principal Component');
ylabel('Variance Explained (%)');
```

```

title('Individual Explained Variance');

subplot(1,2,2);
plot(cumulative_variance, 'o-');
xlabel('Principal Component');
ylabel('Cumulative Variance Explained (%)');
title('Cumulative Explained Variance');
grid on;

```

Normalized by 'center' - mean

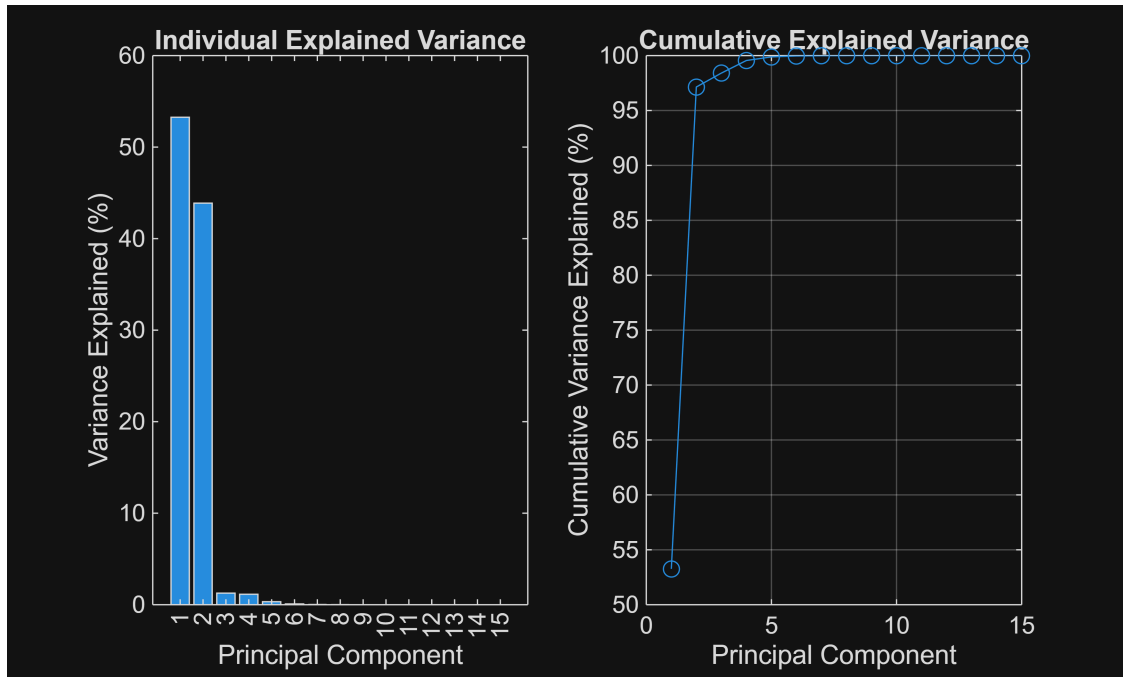

```

X = normalize(data,1,'center','mean');
[coeff, score, latent, ~, explained] = pca(X); % X is your 470x15 data
cumulative_variance = cumsum(explained);

% Plot
figure;
subplot(1,2,1);
bar(explained);
xlabel('Principal Component');
ylabel('Variance Explained (%)');
title('Individual Explained Variance');

subplot(1,2,2);
plot(cumulative_variance, 'o-');
xlabel('Principal Component');
ylabel('Cumulative Variance Explained (%)');
title('Cumulative Explained Variance');
grid on;

```

Normalized by 'center' - median

```
X = normalize(data,1,'center','median');
[coeff, score, latent, ~, explained] = pca(X); % X is your 470x15 data
cumulative_variance = cumsum(explained);

% Plot
figure;
subplot(1,2,1);
bar(explained);
xlabel('Principal Component');
ylabel('Variance Explained (%)');
title('Individual Explained Variance');

subplot(1,2,2);
plot(cumulative_variance, 'o-');
xlabel('Principal Component');
ylabel('Cumulative Variance Explained (%)');
title('Cumulative Explained Variance');
grid on;
```
